Pardon my pun in the title; but I just couldn't help it. Who hasn't done these little

"Spot-The-Difference" type puzzles in local papers, magazines or other puzzle books? Some are simple, some are hard, some are subtle, slight, and some can be very elusive and frustrating to find. If you enjoy them; this is a great book to test your observation skills. The book is excellently conceived and constructed. It has a spiral binding, the best type of binding for this type of book. It has high quality, heavy, glossy paper, and the print and color rendition is also excellent; a must if one wants to rate a book like this as excellent. On quick count, there are 132 different puzzles; and answers supplied for all of them at the back of the book. The puzzles are presented in 4 sections or

Levels;with each Level getting more difficult.The number of differences in the puzzles ranges from 1 to 12.There are also differences in how the puzzles are displayed.Some are two photos per page,identical but with altered differences.Some pages will have 4 to 6 photos and the challenge is to find the 1 difference among them;and some are presented with 2 full- page photos with differences to spot.The differences can vary in objects missing,added,moved,shrunken or enlarged,color changes words altered changes in shapes patterns,or whatever else the creator dreams up to challenge you.Some are very obvious;while others will keep you frustrated in finding the "last" one or more differences;especially in those photos with several differences.But don't let the number of differences make you assume finding only one difference is easy.Finding one small difference in 6 similar photos can be just as hard as finding 6 or more differences in two photos.
